1. The information disclosure statement (IDS) submitted on 02/25/04. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11 rejected under 35 U.S.C. 102(b) as being anticipated by Weinberg et al. (U.S. Patent No. 6,587,969).

With respect to claim 1, Weinberg et al. disclose the software system and methods for testing the functionality of a transactional server including an electronic text parsing unit parsing an electronic text transmitted from a program to be tested to detect a required data item (see e.g. Figs. 6A-7 and col. 21, lines 10-13); and an electronic text data setting unit embedding an input data value, which corresponds to

the detected data item, in an electronic text to be transmitted to a side of the program to be tested (see e.g. Figs. 3A-5F and col. 13, lines 30-67).

With respect to claims 2-4, Weinberg et al. disclose the invention as claimed including a setting screen generating unit generating a data setting screen for receiving the input data value, which corresponds to the detected data item, and giving the set value said electronic text data setting unit (see e.g. Figs. 2-5F); an input value generating unit automatically generating input data in correspondence with the data item detected by said electronic text parsing unit, and giving the generated input data to said setting screen generating unit (see e.g. col. 3, lines 11-28), an electronic text data storing unit storing the set data value embedded by said electronic text data setting unit (see e.g. col. 15, lines 15-34); and an electronic text data reading unit reading the data stored in said electronic text data storing unit, and giving the read data to the setting screen generating unit as the input data (see e.g. col. 21, lines 8-21).

With respect to claims 5-11, the limitations of these claims have been noted in the rejection above. They are therefore consider rejected as set forth above.
